# Data Acceleration Assessment

aws

Unlocking Your Startup's Data Potential

Unlocking the potential of your data is a game-changer for startups. Our Data Acceleration Assessment, up to 100% funded by AWS for qualified startups, empowers you to achieve your data and AI/ML aspirations. We provide the expertise needed to build data infrastructure and strategy effectively from day one, harnessing the power of AWS services like Amazon Athena, Amazon Redshift, and Amazon CloudSearch.

Our workshop answers core business questions, helps you develop new data products, and provides an executive readout with modernization use cases, solution architectures, and ROI analysis. It's your path to data-driven success.

Why should you embark on the Data Acceleration Assessment journey?

Data Strategy Innovation:
Create a use case and business justification that will propel your data strategy innovation, allowing you to differentiate your customer experiences effectively.

Cost Understanding:
Get a firm grasp of AWS consumption estimates, ensuring you optimize your resources and investments effectively.

Strategic Decision-Making:
Facilitate strategic decisions for data activities within the scope of this engagement. Gain clarity on the path forward and chart your course with confidence.

Best Practices:
Leverage the expertise of AWS-certified professionals to receive best practices and recommendations on your strategic direction. You'll receive a high-level implementation roadmap to guide your data journey.

What to expect from the Data Acceleration Assessment

Our process is designed to make your data journey seamless and efficient:

Phase 1
Project Kick-Off:

Our journey starts with a project kick-off meeting. We define objectives, roles, and communication channels, ensuring alignment with your goals.

Phase 3
Design and Report Creation

We craft a customized architecture and deliver a comprehensive report containing recommendations and guidance on remediation, along with effort range estimations.

Phase 2
Discovery

In this phase, we conduct a thorough analysis of your data landscape, identifying opportunities for improvement and growth.

Phase 4
Documentation and Knowledge Transfer

We provide in-depth documentation of the recommended solutions and facilitate knowledge transfer sessions, empowering you to confidently move forward with your data strategy.

About OpsGuru

OpsGuru is a Premier AWS Cloud Consulting Partner specializing in Cloud Adoption, Application Modernization, Kubernetes Enablement, Customer Reliability Engineering, Cloud Security and Data Analytics solutions. Awarded AWS Canada's Partner of the Year 2023, OpsGuru has helped hundreds of customers leverage the power of the AWS cloud platform to help their business scale, improve agility and integrity, and create a strong foundation for a cloud-native future.
